

# Laurus Offices – Healthy environment, high-tech workplace

**L**aurus Offices with its campus-like arrangement provides a calm, safe and green environment for its tenants. When planning the three buildings, the most important goal was to create a liveable workplace that meets all future challenges.

Laurus Offices are located in one of the most dynamically developing districts, ten minutes from downtown and Ferihegy Airport. With the ongoing development projects, the area will be one of the most significant new infrastructural nodes in Pest, with Laurus Offices as the only speculative office project in Pest in 2011. The three-building complex is one of the most accessible developments in the capital, providing a healthy and effective working environment.

The flexibly divisible, ergonomic areas are equipped with opening windows, the highest level of infrastructure, and numerous parking places. The modern building supervisory system guarantees an effective and comfortable working environment for the tenants of Laurus Offices.

Laurus Offices are developed by Immorent, which is a member of the Erste Bank Group and the second largest real estate financing entity in Hungary on the leasing market. The company is actively developing its own projects as well, Laurus Offices being one of them. Besides Hungary, Immorent also operates in nine other Central European countries.
